

Heycoach!!

Release Update

2.22 to 2.23

A few minor bugs detected since the release of 2.22 have been corrected and the additions or modifications to the system are as follows

1. **Custom Reports.** You can now print player, contact or team images in the custom reports.
2. **Official Timelines.** New report showing game timelines per referee for analysis on their ability to control the game.
3. **Shots on Net** Now has the ability to track and report on shots made from rebounds. These are displayed as ovals instead of circles.
4. **Face Offs** You can now set the centres for the game in the face off capture and they will appear at the top of each roster. This should help speed up the capture.
5. **Merge Reports** Any saved reports can now be merged together and then saved as a single report or emailed after the merge like a standard report.
6. **Player Performance** A new report that shows a players performance (goals, points and penalty minutes) against the different opposition teams.
7. **Wizard** A startup wizard has been added to the system. This program will allow the user to begin using the system very quickly.

If you have any questions about or problems with the release contact us either by email at support @heycoachsoftware.com or phone 416-449-4495 ext 350 during office hours EST.
