

Heycoach!!

Release Update

2.37 to 2.38

Below is a list of the changes that have been introduced since 2.37

- 1 In prior releases the Official penalty analysis only printed the penalties issued to a selected team. Now in 2.38 you can choose to print the selected teams penalties, the opposition teams penalties or a combination of both. A new report selection (Us/ Them) allows you to analyze the information in one report.
- 2 In all the Web Page programs the background and/or the frame can be made transparent
- 3 Using the current players maintenance, team selection screens and the custom fields you can now produce a Team Alumni list and pages very similar to the regular Players Roster and Player pages.
- 4 Statistics history (block stats) can be captured in player maintenance by clicking the “Arch” in the toolbar for existing players. There is no limit to the history and it can be captured separately for regular season and playoffs. This data can be shown on the player’s web page (no reports as of yet)

If you have any questions or problems with the above please contact us on 416-587-1280 or at hutchy@heycoachsoftware.com
