

Heycoach!!

Release Update

2.38 to 2.40

2.40 is the first release for the 2004-2005 season

Below is a list of the changes that have been introduced since 2.38

- 1 Scoring chances has been added as a statistic. The Scoring chances are captured in the Game Sheet capture program and are analyzed in the Game Sheet and Head to Head Reports
- 2 Post dated cheques are now allowed in the player registration. There is no limit to the number of cheques per player.
- 3 Replacement Web pages can now be created. These are for situations such as when you begin a new season and have no stats yet you create a page with the same name as last season's stats page saying something like "Season Statistics not yet available"
- 4 Face off statistics are now analyzed by strength and zone
- 5 Two Year End programs now can be run. One for a League type setup and one for and individual team setup. In the individual team year end you can archive the players stats to a history file.
- 6 Importing of schedules from an ASCII file has been added to the system. New teams and leagues can be generated during this procedure

If you have any questions or problems with the above please contact us on 416-587-1280 or at hutchy@heycoachsoftware.com
