

Heycoach!!

Release Update

2.40 to 2.42

2.42 is the second release for the 2004-2005 season

Below is a list of the changes that have been introduced since 2.40

- 1 Functionality of some of the Web Pages has been improved as well as some minor bugs removed
- 2 The Game Program printing now allows for a “small line up” to be printed. This intention of this choice is to allow the “small line up” to be captured as a bitmap for pasting in a custom designed program.

If you have any questions or problems with the above please contact us on 416-587-1280 or at hutchy@heycoachsoftware.com
